William c. gorgas | quickiwiki

William Crawford Gorgas KCMG was a United States Army physician who is best known for his role in the eradication of yellow fever and malaria by controlling the transmission of these diseases through the mosquito. He was the first to identify the mosquito as the vector of yellow fever and to develop methods for its control. His work was instrumental in the successful eradication of yellow fever from the Americas and the Caribbean. He was also instrumental in the control of malaria in the United States and the Caribbean. He was awarded the Medal of Honor in 1917 for his services during the Spanish-American War. He was also a member of the National Academy of Sciences and the National Institute of Health. He was a pioneer in the field of tropical medicine and public health. He was a member of the American Medical Association and the American Public Health Association. He was a member of the National Academy of Medicine and the National Academy of Sciences. He was a member of the National Institute of Health and the National Institute of Tropical Medicine. He was a member of the National Institute of Health and the National Institute of Tropical Medicine. He was a member of the National Institute of Health and the National Institute of Tropical Medicine.
